

2010 Tanner Street Utility Replacement Project

Project Update No. 4

October 11, 2010

Improved weather this week allowed PACT Construction to put in a full week and they were able to install twenty-two (22) new water services. They also connected the new water main to the existing water main at Stiles Avenue and excavated “test pits” at the Kings Highway East intersection. Based upon the results of these test pits, PACT Construction and the Borough Engineer began working on modifications to the proposed storm sewer layout at the intersection.

For the upcoming week, PACT Construction will connect the newly installed water main to the existing mains at Kings Highway East and Clement Street. They also plan on starting the installation of the new sanitary sewer piping at the Library Point area.
